

LEM Group Environmental Policy

As a leading company in electrical measurement, LEM engineers the best solutions for energy and mobility, ensuring that our customers' systems are optimized, reliable and safe.

At LEM, we promote responsibility for the environment within and beyond the organization, communicate and implement this policy at all levels within the workforce and towards our business partners.

Our corporate compliance program integrates our obligations and commitment to integrity in our day-to-day business activities.

ENVIRONMENTAL PERFORMANCE

We assess the environmental impact of our operations and set objectives to improve our environmental performance by:

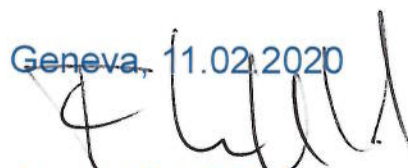

- Reducing the use of energy, water and other resources
- Minimizing waste by reduction, re-use and recycling wherever appropriate
- Reinforcing behavioral and cultural awareness in addition to procedural changes

ECO DESIGN

We continuously innovate on design for manufacturing that is increasingly respectful of the environment and able to satisfy our environmental conscious customers.

SUSTAINABLE SUPPLY CHAIN

We comply with all relevant environmental legislation and regulation. Step by step, we go further by promoting a sustainable supply chain that takes into account environmental and societal challenges.
